

The Journal of **Physiology**

Volume 593 / Number 16 / 15 August 2015

Neuroscience

Perspectives

- 3395 Putting heterosynaptic plasticity in its place – as easy as PIE
Walter E. Babiec and Thomas J. O'Dell (see Hyun et al. p. 3617)

Topical review

- 3397 Nicotine and the adolescent brain
Menglu Yuan, Sarah J. Cross, Sandra E. Loughlin and Frances M. Leslie

Symposium section reviews: Coupling cellular metabolism to neuronal signalling

- 3413 Coupling cellular metabolism to neuronal signalling
Derek Bowie and David Attwell
- 3417 Non-signalling energy use in the brain
Elisabeth Engl and David Attwell
- 3431 Inhibitory and excitatory neuromodulation by hydrogen peroxide: translating energetics to information
Christian R. Lee, Jyoti C. Patel, Brian O'Neill and Margaret E. Rice
- 3447 The regulation of neuronal mitochondrial metabolism by calcium
I. Llorente-Folch, C. B. Rueda, B. Pardo, G. Szabadaki, M. R. Duchon and J. Satrustegui
- 3463 Pannexin channels and ischaemia
Roger J. Thompson
- 3471 Interactions between mitochondria and the transcription factor myocyte enhancer factor 2 (MEF2) regulate neuronal structural and functional plasticity and metaplasticity
Janaina Brusco and Kurt Haas
- 3483 Molecular mechanisms of temperature adaptation
Sviatoslav N. Bagriantsev and Elena O. Grocheva

Computational neuroscience and modelling

- 3493 A neural circuitry that emphasizes spinal feedback generates diverse behaviours of human locomotion
Seungmoon Song and Hartmut Geyer

Neuroscience: cellular/molecular

- 3513 cAMP-dependent protein kinase inhibits $\alpha 7$ nicotinic receptor activity in layer 1 cortical interneurons through activation of D1/D5 dopamine receptors
Pragya Komal, Jassem Estakhr, Melad Kamran, Anthony Renda and Raad Nashmi
- 3533 Reversed electrogenic sodium bicarbonate cotransporter 1 is the major acid loader during recovery from cytosolic alkalosis in mouse cortical astrocytes
Shefeeq M. Theparambil, Zinnia Naoshin, Anne Thyssen and Joachim W. Deitmer

- 3549 Active dendrites mediate stratified gamma-range coincidence detection in hippocampal model neurons
Anindita Das and Rishikesh Narayanan
- 3577 Indirect activation elicits strong correlations between light and electrical responses in ON but not OFF retinal ganglion cells
Maesoon Im and Shelley I. Fried
- 3597 Subregional differences in the generation of fast network oscillations in the rat medial prefrontal cortex (mPFC) *in vitro*
Vasileios Glykos, Miles A. Whittington and Fiona E. N. LeBeau
- 3617 Kv1.2 mediates heterosynaptic modulation of direct cortical synaptic inputs in CA3 pyramidal cells
Jung Ho Hyun, Kisang Eom, Kyu-Hee Lee, Jin Young Bae, Yong Chul Bae, Myoung-Hwan Kim, Sooyun Kim, Won-Kyung Ho and Suk-Ho Lee (see Perspectives)

Neuroscience: behavioral/systems/cognitive

- 3645 Reversing motor adaptation deficits in the ageing brain using non-invasive stimulation
Muriel T. N. Panouillères, Raed A. Joundi, John-Stuart Brittain and Ned Jenkinson
- 3657 Short-latency crossed responses in the human biceps femoris muscle
Andrew J. T. Stevenson, Ernest N. Kamavuoko, Svend S. Geertsens, Dario Farina and Natalie Mrahocz-Kersting
- 3673 Optogenetic excitation of preBötzing complex neurons potently drives inspiratory activity *in vivo*
Zaki Alsaifi, Clayton T. Dickson and Silvia Pagliardini
- 3693 Activation of intestinal spinal afferent endings by changes in intra-mesenteric arterial pressure
A. Humenick, B. N. Chen, L. Wiklendt, N. J. Spencer, V. P. Zagorodnyuk, P. G. Dinning, M. Costa and S. J. H. Brookes
- 3711 Motor units in the human medial gastrocnemius muscle are not spatially localized or functionally grouped
Martin E. Héroux, Harrison J. Brown, J. Timothy Inglis, Gunter P. Siegmund and Jean-Sébastien Blouin

Neuroscience: neurobiology of disease

- 3727 Relationship between subthalamic nucleus neuronal activity and electrocorticogram is altered in the R6/J2 mouse model of Huntington's disease
Joshua W. Callahan and Elizabeth D. Abercrombie
- 3739 Increased excitability of medium-sized dorsal root ganglion neurons by prolonged interleukin-1 β exposure is K⁺ channel dependent and reversible
Patrick L. Sternkowski, Myung-chul Noh, Yishen Chen and Peter A. Smith

Editor-in-Chief

David J. Paterson *Oxford, UK*

Deputy Editors-in-Chief

Asia/Pacific

Yoshihiro Kubo *Okazaki, Japan*

Europe

Julian Paton *Bristol, UK*

The Americas

Kim E. Barrett *San Diego, CA, USA*

Editors

David Adams *Melbourne, Australia*
 Bruno Allard *Lyon, France*
 Andrew Allen *Melbourne, Australia*

The Physiological Society and The Physiological Society logo and The Journal of Physiology and The Journal of Physiology logo are trade marks belonging to The Physiological Society and are registered in the UK and in the EU Community, respectively.

The cover image shows snapshots of a human neuromuscular model walking down a 24% slope. The model behavior is generated by spinal feedback circuits. The resulting muscle activations are color coded with deep red indicating high activation. See Song *et al.* pp 3493–3511.
